Edu-Tech— Empowering Education Through Technology

Edu-Tech is a smart, all-in-one school management platform designed to simplify and modernize how schools operate. It connects administrators, teachers, parents, and students in one seamless digital ecosystem — enabling real-time communication, performance tracking, and data-driven decision-making.

From registration and attendance to payments and academic reporting, Edu-Tech helps schools save time, improve transparency, and enhance learning experiences through technology.

The other main purpose using School Management System Project is to avoid manual problems and also documentation storage problem humans can't maintain long period data, build a computerized system to overcome all problem related to school's data storing and other arias. The system may include a school's website, hostel Management and learning portal system, depending on the chosen Package or Features.

Admin/Principal Features
